Ul. Owocowa 17

10-860 Olsztyn

## REFERENCE FOR DRAMINIŃSKI iScan

I have been using my ultrasound machine, DRAMINIŃSKI iScan, for about 4 years. I've never had any problems during this time.

I'm cleaning it after work (not very carefully) and I have it always in my car (even it's cold during winter). I think it's very easy to use it, to keep it safe and in good condition.

I'm using iScan most often in reproduction of cows and horses. It is a perfect scanner for diagnosis of ovaries and uterus. It's also simple to do things outside, when the animals are on pasture.

I'll absolutely recommend this type of ultrasound machine! I am very happy and pleased with it. To expand our offer for Norwegian customers, I decided to purchase also DRAMINIŃSKI 4VET with various detachable probes.
